

Bob Zurad - Senior Software Engineer

bob.zurad@gmail.com | 262-909-1233 | www.github.com/bobzurad | Franklin, WI

I am a full stack engineer with a passion for making great software. I believe that software should be well crafted and easy to use. In my career I've worked with several satisfied clients to help them meet their software needs, including collaborating with and leading engineers to implement business vision while working closely with UAT engineers, DevOps, and business leadership.

Current Skills:

- Backend: Microservices Architecture, Java, Spring, Node, .NET, C#, Python, SQL
- Frontend: TypeScript, JavaScript, Next.js, React, Angular
- Mobile: React Native (Android and iOS)
- Platforms: Docker, Kubernetes, Linux, macOS, Windows
- AI: Claude Code

Education: Bachelor of Science in Computer Science from University of Wisconsin - Parkside. Graduated June 2005.

Professional Experience

Mimacom – Senior Software Engineer

October 2017 to Present

- Consulted remotely with various clients of Mimacom
- Mentored Junior Engineers
- Served as a technical lead for a team of engineers across US, Europe, and India for Takeda Pharmaceuticals. Main objectives and accomplishments by our team include:
 - Built and maintained a React Native mobile app that is used by medical patients, allowing improved communication and medication management between medical providers and their patients.
 - Maintained and reduced defects to the backend that powers the mobile app, including migrating the backend from Java 8 and Spring Boot 2.x to Java 21 and Spring Boot 3.x.
 - Worked with Takeda management and leadership to ensure product goals and deadlines remained on track.
- Served as a technical lead for a team of engineers across US and India at Baxter International to use Python to execute automated BDD tests on medical pumps, and trained Test Engineers to write Gherkin BDD tests. This allowed Baxter to replace their

process of manually testing their medical pumps with automated tests, vastly decreasing the amount of time needed to execute their formal test plans.

- Collaborated with a small team of engineers at Baxter International, working closely with their VP of Innovation, to architect and build a proof of concept medical device.
- Provided architecture and built out a mobile app prototype with React Native that was then handed off to a client for continued development.

SafeNet Consulting, Inc. – Technical Solutions Consultant

November 2012 to October 2017

Consulted both onsite and remotely with various clients of SafeNet Consulting, including:

- Collaborated with a team of engineers at Quad Graphics building enterprise level software that helped them with Supply Chain management.
- Assisted various clients building out e-commerce websites.
- Provided architecture and built out a mobile app prototype with Xamarin for a client of SafeNet that allowed them to manage their bar inventory.

Red Arrow Labs – Software Engineer

September 2011 to November 2012

Worked with a team of software engineers, building custom enterprise level software and custom websites for clients of Red Arrow Labs.

Centare Group, Ltd. – Staff Consultant

February 2008 to September 2011

Consulted onsite with various clients of Centare Group, Ltd., working with teams of engineers developing enterprise level or private internal software.

Edstrom Industries, Inc. – Embedded Software Engineer

July 2006 to February 2008

Worked with a team of Embedded Engineers building panels to control the flow of drinking water for lab mice.

Midwest Copier Exchange – Programmer / IT Support

January 2004 to July 2006

Developed inventory management software which allowed Midwest Copier Exchange to greatly reduce the amount of time required to perform an audit of their inventory. Also supported the company IT Infrastructure.
